Instruction for data upload

We wrote a function for data import and cleaning, thus we need to standardize the raw data format. Please read the following instruction and re-upload your data.

Folder Name

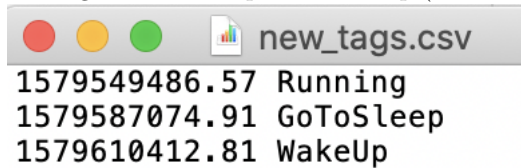

Your folder should be names as “FirstnameLastname,” for instance, “BangyaoZhao” and “NingyuanWang”. Then, you can upload you data in the folder named as “data”, which is inside the “620-GOGOGO” folder.

Foler Content

Do NOT change any data file except the tags.csv (mentioned in next section), only the original folder is perfect. Do NOT make any subfolders. ONLY upload following files: ACC.csv, EDA.csv, HR.csv, TEMP.csv for the sake of storage. You can check the folder LitianZhou for reference.

Requirement for tags.csv

We will only require the tags of GoToSleep and WakeUp (in CamelCase without space!) with notation, named

```
new_tags.csv
1579549486.57 Running
1579587074.91 GoToSleep
1579610412.81 WakeUp
```

as “new_tags.csv”.

You can edit it use Excel or any text editor. It is preferred that you add an empty line at the bottom to avoid warning during data import.

Optionally, you can add activities which interest you like running, exam, or drinking coffee. The only requirement is that you can make sure its timing according to your diary.
